FAQ

1. What devices can be controlled with IR remote?
You can control TV, Air-conditioner, Fan, DVD, TV box, Light, Set-top box, Projector, Audio, Camera, Water Heater, Air purifier, etc.

2. Can i control devices through 2G/3G/4G network?
Both IR remote and mobile device are required to share the same wifi network when adding the IR remote. After configuration done, you can control devices through 2G/3G/4G network. Currently it does not support 5G network.

3. What should i do when device configuration process fail?
You can:
1)Check whether IR remote is powered on or not.
2)Check whether your mobile phone is connected to 2.4GHz wifi network.
3)Check your network connectivity, make sure the router is working properly.
4)Make sure the wifi password entered is correct.

4. The IR remote can go through walls or be used to control devices in upstairs/downstairs rooms?
IR can not penetrate walls, so make sure there is no obstacle between IR remote and the IR devices.

-19-

---

5. We have Huawei/Xiaomi set-top box,why is it not connecting?
There are two types of set-top boxes. OTT and IPTV, the most obvious difference is that IPTV supports living streaming while OTT does not. please make sure you have matching TV box before set-up.

6. What should we do when we are unable to use IR remote to control device?

Please check the following:

1) IR remote network in good condition (click any keys on the remote control panel in the app and see whether the indicator light starts flashing, if it flashes, it indicates to work properly.

2) There are no obstacles or barriers between the IR remote and the electric device .

3) The factory remote control of electric device is IR-enabled. (Cover the top of the IR remote with hand or any objects, then press any keys of the remote control, if the device does not response, it is IR based. Otherwise, it is bluetooth or RF based remote control.
